What is social license to operate?

- Industry-coined term
- Appropriate licenses
- Economically lucrative
- Why were they still experiencing disruptive local and national social opposition?

Social license to operate for aquaculture

WORK TOGETHER AS AN INDUSTRY

 People don't differentiate between brands/ companies

VOLUNTARY STANDARDS

- ✓ Realistic but beyond compliance
- ✓ Good for consumer/ public relations, not shown to greatly influence community-level SLO

SHOW THE INDUSTRY

- ✓ "open days" at land facilities
- ✓ School visits to farms

MESSAGING – NOTHING TO HIDE

- ✓ Persistent and honest
- ✓ Address legacy concerns

LOAD ON THE LOCAL BENEFITS

- Empower communities to decide what they need/ want
- ✓ Make the process transparent

FITTING IN

- ✓ Know the local context
- Develop positive relationships with local organisations

Activities that build trust

LACK OF TRUST IN

BENEFITS

INDUSTRY & REGULATORS

LACK OF COMMUNITY

POOR TRANPARENCY &

COMMUNICATION

Why does social license for seaweed farming, matter?

- General public has limited knowledge
- Knowledge gaps are filled with experiences from other industries
- Local scepticism
- Fit to place and values of local communities
- Scale is a challenge

Do not allow mechanical kelp dredging in Scottish Waters.

Stop MechanicalKelp Dredging started this petition to Scottish Cabinet Secretery for the Environment Roseanna Cunningham

Kelp dredging is currently **not allowed** in Scotland. A company called Marine Biopolymers seek to change that, and have submitted a scoping report to Marine Scotland with a view to gaining permission to dredge over a large area of Scotland's West Coast where they say there could be a 'Significant' Kelp dredge industry.

The importance of our wild kelp beds cannot be overstated.

Example of a grass-roots campaign against an extractive industry; kelp dredging. Source: Change.org 2019

Studying the factors that might lead to social license for seaweed farming

- "Null" case study
 - 18 exploratory qualitative interviews
- Three "aquaculture" case studies
 - Q-method approach
 - 9 initial interviews
 - 16 q-method interviews.

Community perspectives from areas without aquaculture

"I think it's a fairly alien concept to most people. Most people don't really think about seaweed as something that can be cultivated." – Civil Society

"Clear presentation of objective factual information, in a manner appropriate to the target audience, is the best way to allow stakeholders to make informed decisions." - Fisheries

- Associations with other marine industries
- Desire for more information
- Strong request for robust planning

Groupings of views on social license to operate for seaweed farming

Group 1: Prioritising environmental sustainability and a variety of development models and scales

- ✓ Perceived environmental sustainability
- ✓ Social and political legitimacy
- ✓ Economic feasibility

Stakeholders from:

Government & Regulation, Aquaculture (Salmon and Seaweed), and Academia in Scotland and Wales

Group 2: Prioritising smaller scales, local social benefits and environmental sustainability

- ✓ Perceived environmental sustainability
- ✓ Social and political legitimacy
- ✓ Understanding socio-economic contexts

Stakeholders from:

Aquaculture (seaweed cultivators) and Civil Society (NGO) in Scotland and Wales

Group 3: Prioritising regulation and business development

- ✓ Trust in regulations and regulators
- ✓ Economic feasibility

Stakeholders from: Fisheries and Civil Society in Wales and England

What makes a seaweed farm acceptable?

- Environmental sustainability
- Smaller scales
- Communication and meaningful engagement
- National, regional or local ownership models
- Monitoring, adaptation, and regulation

What can seaweed farmers do to foster social license?

- ✓ Build a context-specific approach to site selection
- ✓ Engage with local communities and relevant stakeholders
- ✓ Adapt farming practices towards sustainability
- ✓ Develop and contribute to ocean literacy activities
- ✓ Communicate with industry bodies and regulatory agencies

With special thanks to all of the participants that freely contributed their time and expertise to this work.
